Effective occlusal appliances don't just happen – they're the result of the precise execution of clinical and laboratory phases of treatment. This course will focus on the time-tested techniques and protocols that have enabled F.A.C.E.-trained practitioners to efficiently and consistently achieve outstanding results.

The F.A.C.E. Orthopedic Stabilizing Appliance (F.O.S.A.) helps in the treatment of:

- ◆ Severely worn dentition.
- ◆ TMD symptoms due to occlusal disharmonies.
- ◆ Pre-restorative stabilization of TMJs.
- ◆ Stabilization of occlusal forces for improved results in Perio Treatments.
- ◆ Protecting Aesthetic Restorations from the ravages of nocturnal Bruxing & Clenching.

Testimonial.... *"I was trained how to properly make splints in centric relation at F.A.C.E.... and my patients have benefited tremendously from both the diagnostic and the treatment applications a well made splint provides. The first benefit I enjoyed from the F.O.S.A. was to get patients out of pain."*

Guy Peabody, DDS
